## TIPOLOGIE DI FILTRO ABITACOLO

La salute ed il benessere del guidatore del veicolo dipende dalla qualità dell'aria che si respira nell'abitacolo.

Compito fondamentale di un filtro abitacolo è quello di garantirne la massima qualità, proteggendo in totalità l'operatore da polveri, pollini, gas, cattivi odori, batteri e virus.

I più recenti dati statistici confermano che l'assenza di un filtro abitacolo ad altissime prestazioni aggrava il livello di inquinamento all'interno dell'abitacolo, inoltre, con il filtro intasato, i vetri si appannano più facilmente, disturbando la visibilità e mettendo in pericolo la sicurezza.

**Filtro antipolvere**

**EN**  
The health and well-being of the vehicle driver depend on the quality of the air we breath in the passenger compartment. The basic task of a cabin filter is to ensure maximum air quality, protecting the driver from dust, pollen, gases, bad odours, bacteria and viruses. The latest statistics confirm that the absence of a high-performance cabin filter increases the level of pollution in the passenger compartment and, with a clogged filter, windows fog up more easily, impairing visibility and endangering safety.

**DE**  
Die Gesundheit und das Wohlbefinden des Fahrzeugführers hängen von der Qualität der Luft ab, die er im Fahrgastraum atmet. Die Hauptaufgabe eines Innenraumfilters besteht darin, eine maximale Luftqualität zu gewährleisten und den Fahrer vor Staub, Pollen, Gasen, schlechten Gerüchen, Bakterien und Viren zu schützen. Die neuesten Statistiken bestätigen, dass das Fehlen eines leistungsfähigen Innenraumfilters die Schadstoffbelastung im Fahrzeuginnenraum erhöht und bei einem verstopften Filter die Scheiben leichter beschlagen, was die Sicht beeinträchtigt und die Sicherheit gefährdet.

**FR**  
La santé et le bien-être du conducteur d'un véhicule dépendent de la qualité de l'air qu'il respire. La tâche fondamentale d'un filtre intérieur est de garantir une qualité d'air optimale, en protégeant le conducteur de la poussière, du pollen, des gaz, des mauvaises odeurs, des bactéries et des virus. Les dernières statistiques confirment que l'absence d'un filtre d'habitacle performant augmente le niveau de pollution dans l'habitacle et, avec un filtre bouché, les vitres s'embuent plus facilement, ce qui nuit à la visibilité et compromet la sécurité.

**ES**  
La salud y el bienestar del conductor del vehículo dependen de la calidad del aire que respira en el habitáculo. La tarea básica de un filtro de habitáculo es garantizar la máxima calidad del aire, protegiendo al conductor del polvo, el polen, los gases, los malos olores, las bacterias y los virus. Las últimas estadísticas confirman que la ausencia de un filtro de habitáculo de alto rendimiento aumenta el nivel de contaminación en el compartimento de los pasajeros y, con un filtro obstruido, las ventanas se empañan más fácilmente, lo que dificulta la visibilidad y pone en peligro la seguridad.
